

Basic Questions

1. What is a Stored Procedure in SQL?
 2. What are the main benefits of using Stored Procedures?
 3. How do you create and execute a Stored Procedure?
 4. What is the difference between a Stored Procedure and a Function?
 5. Can a Stored Procedure return a value? If yes, how?
 6. What is the default return value of a Stored Procedure?
 7. Can a Stored Procedure be called inside another Stored Procedure?
-

Intermediate Questions

8. What are Input and Output parameters in a Stored Procedure?
 9. How do you pass multiple parameters to a Stored Procedure?
 10. What is the difference between Temporary and Permanent Stored Procedures?
 11. How do you handle exceptions inside a Stored Procedure?
 12. How do you encrypt the definition of a Stored Procedure?
 13. How can you debug a Stored Procedure in SQL Server?
 14. Can a Stored Procedure return multiple result sets?
-

Advanced Questions

15. How do you optimize a Stored Procedure for better performance?
 16. What is the difference between `sp_executesql` and `EXEC` in dynamic SQL?
 17. How do you handle transactions within a Stored Procedure?
 18. What are schema-bound Stored Procedures?
 19. How do you manage permissions for Stored Procedures?
 20. Can Stored Procedures be used to implement business logic?
-

Scenario-Based Questions

21. Write a Stored Procedure to get the top 5 highest paid employees from a table.
22. Create a Stored Procedure to update an employee's salary based on EmployeeID.
23. Write a Stored Procedure to insert a new record into a table and return the new ID.
24. Create a Stored Procedure to fetch employees who worked more than 100 hours on a project.
25. Write a Stored Procedure to delete records older than 1 year from a log table.
26. Design a Stored Procedure that accepts a comma-separated list of IDs as input and returns matching records.

Table Structures

Employees

EmployeeID	FirstName	LastName	Department	Salary	HireDate
1	John	Doe	HR	50000	2020-01-15
2	Jane	Smith	Finance	60000	2019-03-10
3	Michael	Brown	IT	75000	2021-06-25
4	Sara	Johnson	IT	72000	2021-09-01
5	David	Wilson	HR	55000	2020-11-20
6	Emma	Taylor	Finance	65000	2018-07-15
7	Chris	Green	Marketing	58000	2022-05-01
8	Olivia	White	Marketing	70000	2023-02-14

Projects

ProjectID	ProjectName	StartDate	EndDate
101	Recruitment Drive	2023-01-10	2023-06-10
102	Budget Planning	2023-02-01	2023-07-01
103	System Upgrade	2023-03-15	2023-08-15
104	Social Media Campaign	2023-04-05	2023-09-05

EmployeeProjects

EmployeeID	ProjectID	HoursWorked
1	101	120
2	102	150
3	103	200
4	103	180
5	101	100
6	102	160
7	104	140
8	104	130
3	104	90
7	103	110
2	101	95

Logs

LogID	LogMessage	LogDate
1001	Login Success	2024-08-01
1002	Data Updated	2023-06-15
1003	Login Failed	2023-01-10

LogID	LogMessage	LogDate
1004	Password Changed	2022-12-05
1005	Data Deleted	2021-05-20

Scenario-Based Stored Procedure Questions

- Top Salaries:**
 Write a stored procedure to get the **top 5 highest-paid employees**.
- Update Salary:**
 Create a stored procedure to **update an employee's salary** based on EmployeeID.
- Insert & Return ID:**
 Write a stored procedure to **insert a new record** into Employees table and **return the new EmployeeID**.
- Hours Worked Filter:**
 Create a stored procedure to **fetch employees** who worked **more than 100 hours** on any project.
- Delete Old Logs:**
 Write a stored procedure to **delete records older than 1 year** from Logs table.
- Comma-Separated IDs:**
 Create a stored procedure that **accepts a comma-separated list of EmployeeIDs** and returns their details.
